Professional Summary

AI-focused Full Stack Developer with hands-on experience in MERN stack technologies, including React and Next.js, and a growing proficiency in AI and Machine Learning using Python frameworks. Skilled in building intelligent, scalable, and responsive web applications that integrate AI capabilities. Recognized for adaptability, attention to detail, and strong problem-solving skills in dynamic software development environments.

Projects

Get Me A Chai - Crowdfunding Platform ·

<https://github.com/Rishi-Rana01/get-me-a-chai>

[Next.js](#) [MongoDB](#) [Razorpay](#) [NextAuth.js](#) [Tailwind CSS](#)

- Developed a full-stack Next.js application enabling users to support creators through secure donations, integrating Razorpay for payment processing.
- Engineered backend logic and data models using Next.js API Routes and Mongoose for efficient data handling.
- Designed a responsive, mobile-friendly user interface with Tailwind CSS to enhance user experience and accessibility.

AI-Powered Code Reviewer ·

<https://github.com/Rishi-Rana01/AI-Powered-Code-Reviewer>

[React](#) [Node.js](#) [Express.js](#) [JavaScript](#)

- Built a full-stack application featuring a Node.js/Express backend that exposes a REST API for AI-driven code analysis.
- Developed a modern React frontend using Vite, allowing users to submit code and receive real-time AI-generated reviews.
- Integrated frontend and backend for a seamless client-server workflow, demonstrating strong API development and integration skills.

Tweet App - Django Project ·

<https://github.com/RishiRana01/Django/tree/main/PROJECT#tweet-app---django-project>

[Python](#) [Django](#)

- Developed a full-stack web application using Python and Django, enabling authenticated users to perform CRUD operations on tweets with image uploads.
- Utilized Django ORM for efficient database management and implemented a responsive UI with Django templates to improve usability.
